

## Safety Tips

- No FOOD and uncapped beverages in the pits
- No baggy and loose clothing, ties, earphones, and dangling jewelry
- Safety equipment (PPE) is a must!
- Use the correct tools for the correct job. No wrenches as hammers please!
- Have MSDS sheets for all chemicals
- Lift heavy loads with your legs, while not twisting you back, keeping your back straight and keeping close to the load

TEAM 6632 - SAFETY MANUAL

## Quick and Easy Safety Quiz

You can have objects that extend past the 10-foot height limit in your pit. (True/False)

The UL Safety Advisors are the only people that can call and conduct safety meetings at competitions. (True/False)

What are two safety issues if you drive your robot on a surface that is not carpet?

You should only be concerned with the safety of your team, your pits, and your spectators. (True/False)

What personal safety items should you bring to a competition?  
(Name 3 items)

Complete the quiz with a perfect score and check your answers with Team 6632's Safety Captain to enter a draw for a \$10 Subway Gift Card before closing ceremony

We Like To Educate

### Things To Look Out For:

- Watch out for long, untied hair
- Watch out for unaccompanied children under 12 and baby strollers
- Watch out for unclean and messy pits

### How You Can Help Out:

- Have 1 on 1 training with other team members about safe practices
- Help other teams out in the pits when you are free
- Reach out to other teams for advice on Safety and to educate them about Safety as well
